Instance messaging with Pidgin

Instance messaging with Pidgin

Instant messaging program for Windows, Linux, BSD, and other Unixes. You can talk to your friends using AIM, ICQ, Jabber/XMPP, MSN Messenger, Yahoo!, Bonjour, Gadu-Gadu, IRC, Novell GroupWise Messenger, QQ, Lotus Sametime, SILC, SIMPLE, MySpaceIM, and Zephyr.

Can log in to multiple accounts.

Pidgin supports many features of the various networks, such as file transfer, away messages, and typing notification.

Pidgin runs on a number of platforms, including Windows, Linux, and other UNIX operating systems.

Pidgin integrates well with GNOME 2 and KDE 3.1's system tray, as well as Windows' own system tray.

Dia the power of diagram

Gimp the best tool that free for image process

Dia is inspired by the commercial Windows program 'Visio', though more geared towards informal diagrams for casual use. It can be used to draw many different kinds of diagrams. It currently has special objects to help draw entity relationship diagrams, UML diagrams, flowcharts, network diagrams, and many other diagrams. It is also possible to add support for new shapes by writing simple XML files, using a subset of SVG to draw the shape.
