"wizpy"
- An alternative way to expand the use of Linux OS -

Noriaki Fukuyasu
Director, International Business Div.
Turbolinux, Inc.

turbolinux

Everybody talks about linux…
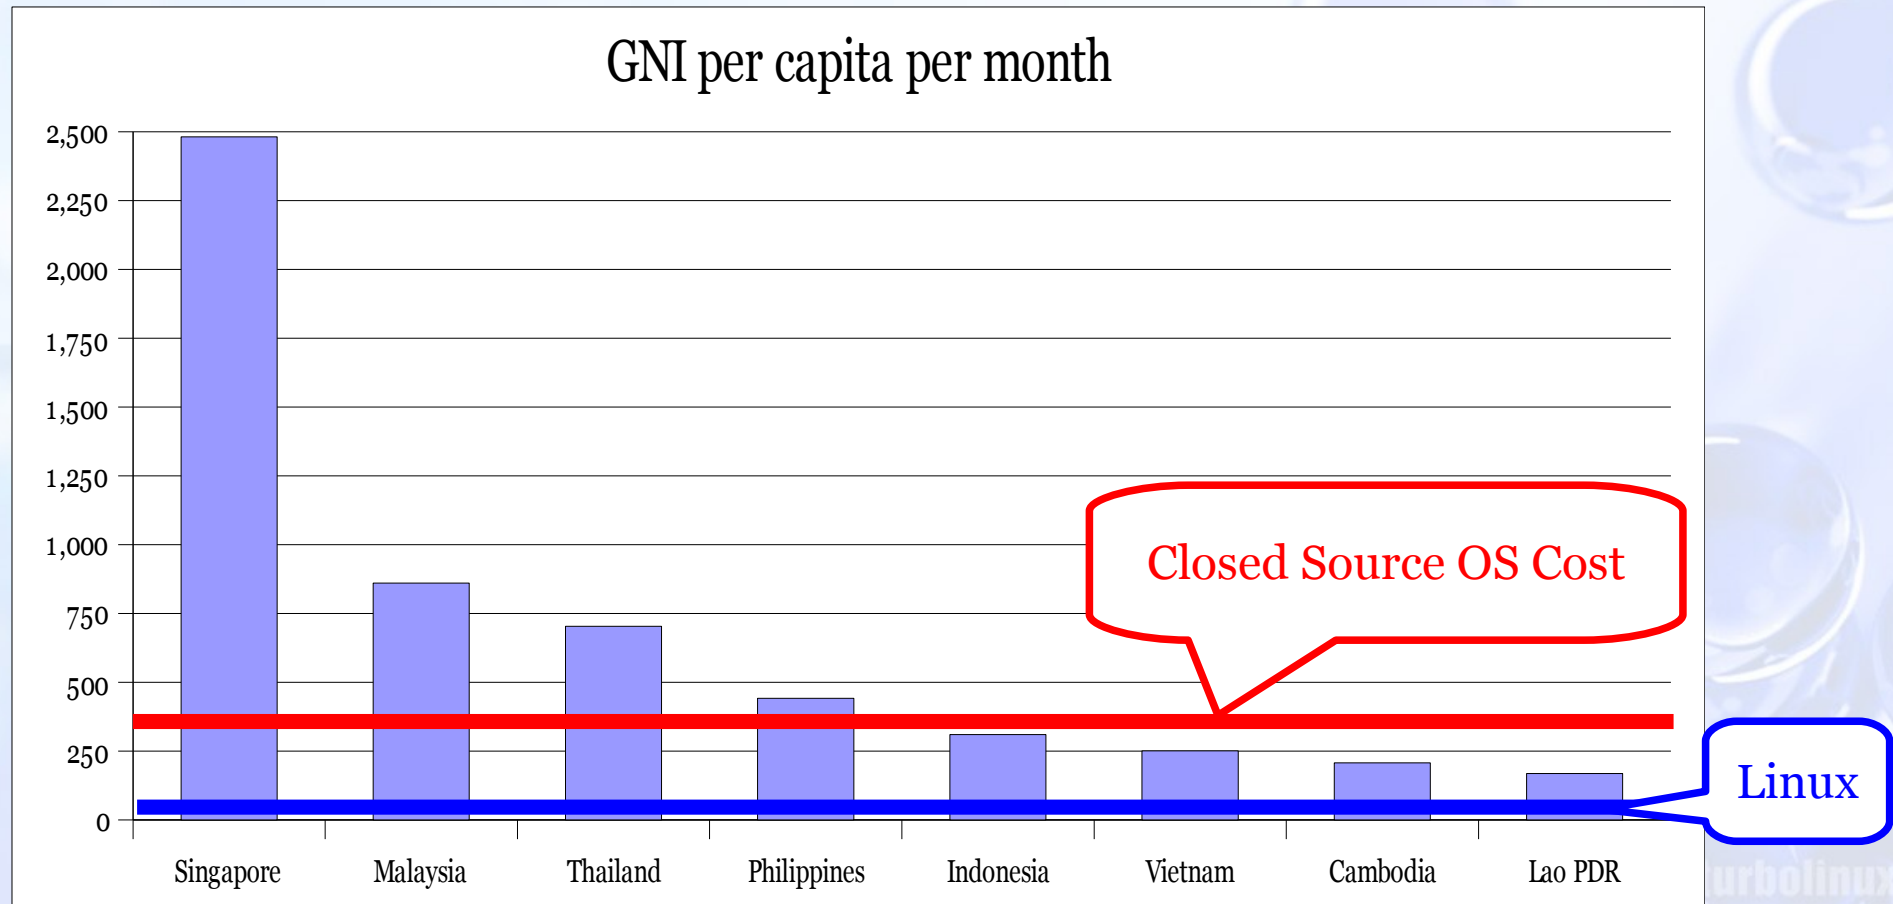

Safety

Stability

Cost Competitive

Continuity

Flexibility

and more…

We all know these

Linux should be the solution to promote IT

ASEAN Countries' GNI (Gross National Income)

GNI per capita per month

Closed Source OS Cost

Linux

(*) Date for Brunei and Myanmar are not available
Source: World Bank, 2006. Based on PPP in international dollars

But then…
# why Linux has not been promoted as much?

✔ **Lack of Applications**

✔ **People's Prejudice**

But more importantly…

The rule of current ball game

The Current Ball Game: PC ⊃ OS

User's mind set "PC⊃OS"

OS Provider

CSS Vendor A (Majority)

OS Development

Linux Vendor

HW Vendor

Pre-Install

Packaging

User

Install

Not many people would do this.

We need a new way of doing the ball game

We needed the way so that the users don't have to install the operating system any

the solution is...

USB Bootable OS Device

"wizpy"

It is a chance for making a revolution

Ubiquitous

web2.0

Broadband

- **We see some new concepts that express a new era of internet biz.**
- **Many new biz (ex. SNS, Youtube) are arising & creating a new market**

Chance to create a new rule of the ball game for OSS!

Our new ball game is to separate OS from PC

Software

- **Just like land line phones has been replaced by mobile phones, we believe SOFTWARE WILL ALSO BECOME MOBILE.**

- **Because it is the best way to maintain the SECURITY and PRIVACY in use of IT**
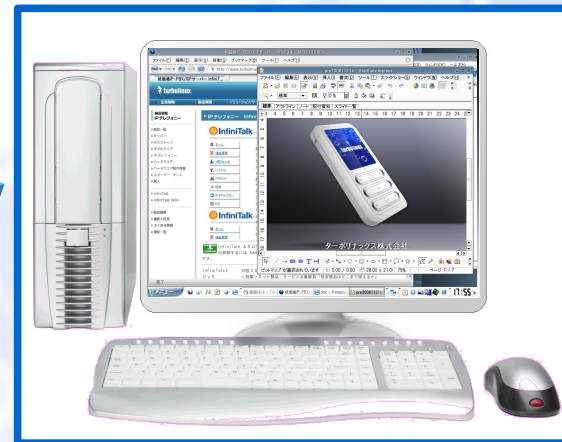

**Software**

Software

Make any computers yours ...

Your own desktop set ups and software are stored
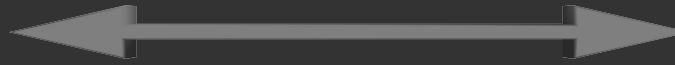

Connect to the PCs

Become your own PC

A new ball game will change in your life style with its PORTABILITY

Before

Home

Office
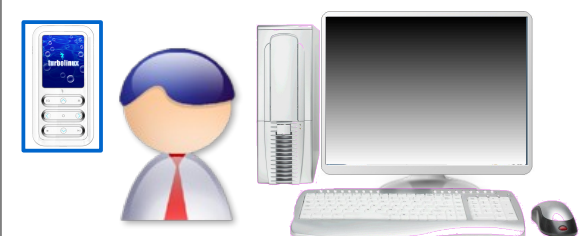

After

Home

Office

A new ball game will change in your life style with its higher PRIVACY

PEOPLE WILL CARRY…

- **Personal Data**
- **Mail Data**
- **Web Browser Bookmark**
- **Web Browser Cache**
- **Web Site Log-in Information**

In Summary

✔ In the present business scene, particularly in consumer segment, the rule of the game has been developed and driven by Closed Source Software Industry, hence, OSS is somewhat experiencing a struggle.

✔ To be able to overcome this struggle, OSS has to go out of their ball park, and create its own.

✔ One of the way which Turbolinux is proposing is to separate OS from PC by "wizpy."

Major Functions of

Turbolinux's wizpy

With PC

Applications

Enjoy Web !

- **High performance web browser which fully support web2.0.**
- **Other plug-ins will also be provided.**

Emjoy E-Mail !

- **E-Mail Client which has spam protectiona, embedded RSS Reader, and Quick Search Fuctions.**

Enjoy Communication !

- **P2P IP Telephone function is embbeded**

With PC

Applications

Enjoy Musics !

- **Music Player which has functionalities like play music files, jacket picture registration, and ID3Tag edit**
- **Ripping Software**

Enjoy Motion Picture !

- **Media player which support variety of file format.**

Enjoy Photo !

- **High quality image viewer**

With PC

Applications

And.... Great Bisness Use as well !

- Open Office 2.0
- Word processing, Spread Sheat, Presentation, and more!

With Player

Functions

Play Music !

- OGG, MP3, WMA, AAC supported

Record Voices !

- Recorded a MP3 file by using embedded microphone

Enjoy the radio !

- FM Radio is also available

Play Motion Picture !

- Xvid files supported
- 1.71 inches OLED Display

Enjoy Pictures

- Display jpeg files
- Preview functions

Read the texts !

- Text viewer functions

Think global, **Act local.**
